

Devansh Rahatal

Data Analyst | Business Analyst | Power BI Developer

Vadodara, Gujarat | devanshrahatal@gmail.com | +91 6354937925 | [linkedin.com/devansh-rahatal](https://www.linkedin.com/devansh-rahatal) | github.com/devanshrahatal

PROFESSIONAL SUMMARY

Results-driven Data Analyst with hands-on experience across 10+ projects spanning data analytics, business intelligence, and machine learning. Skilled in Python, SQL, and Power BI, with additional experience in Docker and FastAPI for end-to-end deployment. Proven track record of building predictive models and BI dashboards that translate raw data into decision-ready insight across 3+ domains, including healthcare, driver safety, and logistics. Seeking to leverage this blend of technical depth and business acumen to deliver impact as a Data Analyst.

CORE SKILLS

Technical: SQL & Data Modeling, Star-Schema Warehousing, EDA & Statistics, Feature Engineering & ML, Computer Vision

Tools & Platforms: Power BI (DAX & Power Query), Python (Pandas, NumPy, Scikit-Learn), MySQL, FastAPI, Git & GitHub

Other: Data Storytelling & Executive Reporting, Stakeholder Communication, Analytical Problem Solving

PROFESSIONAL EXPERIENCE

Data Analyst Trainee

Jun 2026 – Jul 2026

LinuxWorld Informatics Pvt. Ltd.

Jaipur, Rajasthan

- Delivered 10+ analytics case studies and dashboards using Excel, SQL, Python, and Power BI across data cleaning, EDA, and KPI reporting.
- Built end-to-end analytical solutions covering data preparation, visualization, and reporting for real-world business scenarios.

Lecturer Intern (System Programming)

Jun 2025 – Nov 2025

ITM SLS Baroda University

Vadodara, Gujarat

- Conducted 40+ System Programming lab sessions, mentoring 100+ diploma students through hands-on technical instruction.
- Evaluated 300+ practical assessments, maintaining accurate academic records and timely performance reporting.

PROJECTS

ReadmitIQ – Patient Readmission Risk Analyzer [\[Github Link\]](#)

Jun 2026

Python, XGBoost, SHAP, FastAPI, Docker, Power BI

- Built a 6-table MySQL star schema predicting 30-day readmission risk across 100k+ patient EHR records.
- Trained an XGBoost model with SMOTE in 5-fold CV and 11 features, storing 100% of SHAP risk factors in MySQL.
- Achieved 0.65 ROC-AUC and 43.4% recall, deploying a sub-100ms FastAPI API and 4-page Power BI dashboard.

DriveGuard – Driver State Monitoring System [\[Github Link\]](#)

Nov 2025

Python, OpenCV, MediaPipe, Matplotlib, FPDF, Tkinter

- Engineered a 30 FPS MediaPipe/OpenCV vision pipeline tracking EAR (<0.23) and MAR (>0.6) for fatigue detection.
- Implemented a 0–100% fatigue scoring engine triggering automated SMTP alerts within 15s and 5s video recording.
- Processed 10-metric CSV telemetry logs to auto-generate 3 Matplotlib trend charts and A–F graded PDF reports.

Zomato Operations Intelligence – Executive & Logistics Dashboard [\[Github Link\]](#)

Jul 2026

SQL, Python, Power BI, DAX, Power Query

- Built a MySQL star schema (7 dim, 2 fact tables) modeling 18 months of delivery logistics across 15 cities.
- Engineered a Python pipeline generating 120k+ orders and 123k+ payments with realistic monsoon delays & SLAs.
- Designed 38 custom DAX measures across 3 Power BI dashboards tracking On-Time Delivery (90% SLA) and churn.

EDUCATION

• 10th Grade – Kendriya Vidyalaya No. 2, Army, Baroda

Percentage : 84 % | 2021 | Gujarat, India

• 12th Grade – Kendriya Vidyalaya No. 2, Army, Baroda

Percentage : 72 % | 2023 | Gujarat, India

• B.Tech. (A.I. & Data Science) – ITM SLS Baroda University

CPI : 9.15 | 2023 – 2027 | Gujarat, India

CERTIFICATIONS

• Foundation Course in Python, Data Analysis & Artificial Intelligence

Edunet Foundation | SAP Code Unnati (2025)

• Advanced Course in Machine Learning, Deep Learning & SAP Analytics

Edunet Foundation | SAP Code Unnati (2026)

• Industrial Training in Data Analytics & Business Intelligence
